

### Formål

Ingen er vel i tvivl om, at lægefaget er en profession, hvis medlemmer skal optræde professionelt. Dette afspejles blandt andet i, at én af de syv lægeroller alene vedrører rollen som "professionel". Men hvordan er det egentlig, at begrebet "professionalisme" bruges i relation til lægefaget generelt og til lægeuddannelsen specifikt? Og bruger vi det på samme måde?

Formålet med denne temadag er at diskutere, nuancere og præcisere begrebet professionalisme. Formålet med dagen er også at eksperimentere med formatet, så deltagerne gennem aktivt samarbejde alle er med til at bidrage til et større fælles udbytte og får mulighed for at netværke med hinanden.
